## ABOUT KANGSHIELD /

KANGSHIELD Safety Protective Technology ( China ) Co., Ltd is the international comprehensive one-stop supplier focusing on the design, manufacture and sales of PPE. In order to provide products which conform to international safety standards and meet customers' actual requirements, we have established a complete quality control system which will also offer powerful support for brand establishment. All products we provide are in compliance with the ANSI , GB and CE certification.

Relying on the international logistics platform and the exclusive customs cargo passage of KANGSHIELD , we are able to safely deliver all the goods to designated warehouses within a shorter period of time which will efficiently save time and operation costs for customers.

To enhance the cargo delivery capacity, we have established warehouses in Dubai, the United States, Colombia, Peru and other countries.

## EN 374-1

### AGAINST THE RISKS OF MICRO-ORGANISMS & CHEMICAL RISKS

Standard EN374-1, protective gloves against chemicals and micro-organisms, specifies the performance requirements required for gloves for protecting users against chemical products and micro-organisms and defines the terms to be used:

- Penetration (tested as per standard EN374-2):

Diffusion, at a non-molecular scale, of a chemical product and/or micro-organism through the porosities, seams, micro-holes or other imperfections present in the material of the protective gloves.

- Permeation (tested as per standard EN374-3):

Process by which a chemical product diffuses through the material of the protective gloves, at the molecular scale .

Among the following chemical products, pick up 3 kinds of gloves to be tested. If the permeation index could at least up to degree 2, the gloves will be considered to have the anti-chemical corrosion performance.

| CODE LETTER | CHEMICAL PRODUCT                           |
|-------------|--|
| A           | Methanol                                   |
| B           | Acetone                                    |
| C           | Acetonitrile                               |
| D           | Dichloromethane                            |
| E           | Carbon disulfide                           |
| F           | Toluene                                    |
| G           | Diethylamine                               |
| H           | Tetrahydrofurane                           |
| I           | Ethyl acetate                              |
| J           | n-Heptane                                  |
| K           | Caustic soda 40%(NaOH or sodium hydroxide) |
| L           | Sulphuric acid 96%                         |

| Passage time measured(MN) | Performance index to permeation |
|---------------------------|---------------------------------|
| >10mn                     | 1                               |
| >30mn                     | 2                               |
| >60mn                     | 3                               |
| >120mn                    | 4                               |
| >240mn                    | 5                               |
| >480mn                    | 6                               |

#### Examples of application:

|  | <p>The application field is certain. According to the case, the gloves must be water proof, air proof, micro-organisms resistant, anti-low concentration chemical splash, resistant to low concentration chemical or other chemical corrosion.</p> <p>It is therefore highly important to consult the recommended fields of use.</p> |
|--|--|
| CATEGORIES AS PER CATEGORIAS EM 89/686CEE  | EXAMPLES OF USES APPLICATIONS  |
|  <b>CAT I</b><br>For minor risks          | Waterproof gloves for very frequent and prolonged use(dish washing gloves)   |
|  <b>CAT III</b><br>For intermediary risks | Glove against micro-organisms (bacteria, fungi), air and water proof   |
|  <b>CAT III</b><br>For irreversible risks | Glove offering low protection against Chemical products (occasional contact ), air and water proof.  |
|  <b>CAT III</b><br>For irreversible risks | Glove against chemical products (direct and prolonged contact ), air and water proof.  |

## GLOVE SIZE TABLE

Right palm close together fingers down on the map. The index finger should be aligned with the blue line (but should not be covered), and the position of the thumb bifurcation corresponds to the location depicted in the figure. The data in the figure is based on your hand width as your size. You can read your size in the colored lines.

## HAND PROTECTION /

### ANTI-SMASHING GLOVES KRONOS76-110

▲  
Add reflective strips in the middle of the back of the hand to increase the reflective effect.

▲  
Use PVC glue to increase the anti-slip performance.

▲  
The back of the hand adopts TPR material to increase the anti-smashing effect.

Standard: CE EN388-4121

- **Material:** polyester stair cloth, microfiber leather, anti-slip
  - ① The palm with microfiber leather and PVC dots can be more durable and smooth.
  - ② The TPR finger and the back of the hand can be avoided from injure in the operation, and the sealing of the palm of the Kevlar fire resistant line can continue to work at high temperature.
- **Application industry:** construction, maintenance, oil and gas, material handing.

## CUT RESISTANT GLOVES

### KRONOS75-544

The knitted cuff can effectively protect the wrist.

The grinding material is used to improve the anti-slip effect and good wear resistance.

The use of HDPE material can achieve better anti-cut effect.

Standard: CE EN388-4543

- The cuffs can be used in a variety of colors to distinguish sizes.
- **Knitting:** 13G HDPE
- **Coating:** sandy nitrile
- **Cut level:** 5
- **Size:** 8.9.10
- Flexible and comfortable; Abrasion resistant; tear resistant.

# HAND PROTECTION /

## ^ KANGSHIELD73-211

### PVC dotted gloves

**Knitting:** 10G  
**Coating:** PVC dotted  
**Size:** 8.9.10

- The palm and the back of the hand are used with glue to increase the wear resistant and anti-slip effect of gloves.
- Suitable for construction, farm planting, gardening, auto repair, mining etc.

## ^ KANGSHIELD74-526

### Welding gloves

**Material:** cow leather  
**Cuff:** safety cuff  
**Length:** 14"

- Adopt good AB – grade cow leather, prevent from the arc burn, spray scald and contact scald.
- Suitable for welding, cutting, assembling and carrying.

## ^ KANGSHIELD74-622

### Sheepskin gloves

**Material:** sheep leather  
**Length:** 10"

- Adopt high-quality sheepskin, which will be more comfortable and breathable.
- Suitable for welding, driving, assembling, handling environments.

## ^ KANGSHIELD79-314

### Latex coated gloves

**Knitting:** 7 gauge acrylic flannelette.  
**Coating:** Foamed latex  
**Size:** 8.9.10

- Elastic and comfortable, good grip.
- Excellent breathability.
- Special suitable for mechanical and low-temperature environments.

**Standard:** CE EN388-2231

⤴ KANGSHIELD73-212

### Cotton gloves

**Knitting:** 10G  
**Weight:** 50g  
**Size:** 8.9.10

- Suitable for construction, farm planting, gardening, auto repair, mining etc.

⤴ KANGSHIELD70-314

### Latex coated gloves

**Knitting:** 10 gauge cotton  
**Coating:** Latex wrinkling  
**Size:** 8.9.10

- Flexible and comfortable.
- Excellent grip and anti-slip.
- Suitable for mechanical environments.

**Standard:** CE EN388-2242

⤴ MIBRON77-510

### PU coated gloves

**Knitting:** 13G polyester  
**Coating:** PU  
**Weight:** 28g  
**Size:** 8.9.10

- Flexible and super comfortable.
- Excellent elastic, micropore structure.
- Abrasion resistance, tear resistance.
- Anti-static.

**Standard:** CE EN388-4111

⤴ MIBRON77-354

### Latex coated gloves

**Knitting:** 13G polyester  
**Coating:** Foam latex  
**Weight:** 33g  
**Size:** 8.9.10

- Flexible and super comfortable.
- Excellent breathability.
- Suitable for mechanical environments.

**Standard:** CE EN388-2131

## Nitrile coated gloves

**Liner:** Cotton wool  
**Cuff:** Safety cuff  
**Coating:** Nitrile  
**Weight:** 100g  
**Size:** 8.9.10

- Comfortable and convenient.
- Excellent abrasion and low temperature resistance.
- Oil proof ,penetration resistance.

**Standard:** CE EN388-4111

⤴ KANGSHIELD73-411

## PVC dotted gloves

**Liner:** Twill cotton  
**Coating:** PVC dotted  
**Weight:** 65g  
**Size:** 8.9.10

- Suitable for construction, farm planting, gardening, auto repair, mining etc.

⤴ KRONOS70-426

## Nitrile coated gloves

**Liner:** Cotton wool  
**Cuff:** Knitting cuff  
**Coating:** Nitrile  
**Weight:** 100g  
**Size:** 8.9.10

- Comfortable and convenient.
- Excellent abrasion and low temperature resistance.
- Oil proof ,penetration resistance.

**Standard:** CE EN388-3111

⤴ KRONOS75-316

## Cut resistant gloves

**Knitting:** 13G HDPE  
**Coating:** PU  
**Cut level:** 3  
**Size:** 8.9.10

- Flexible and comfortable.
- Abrasion resistance, tear resistance.

**Standard:** CE EN388-4342

⤴ KRONOS75-410

**Cut resistant gloves**

Knitting: 18G HDPE

Coating: PU

Cut level: 3

Size: 8.9.10

- Flexible and comfortable.
- Abrasion resistance, tear resistance.

Standard: CE EN388-4342

⤴ KRONOS75-556

**Cut resistant gloves**

Knitting: 13G HDPE

Coating: Foam latex

Cut level: 5

Size: 8.9.10

- Flexible and comfortable.
- Abrasion resistance, tear resistance.

Standard: CE EN388-4542

⤴ KRONOS75-551

**Cut resistant gloves**

Knitting: 13G HDPE

Coating: Latex wrinkling

Cut level: 5

Size: 8.9.10

- Flexible and comfortable.
- Abrasion resistance, tear resistance.

Standard: CE EN388-4542

⤴ KANGSHIELD78-214

**Insulating gloves**

Material: latex

- Electrical insulation grade: 10kv.
- Flexible and super comfortable.
- Can be used with ordinary gloves.
- Suitable for electrical environments.
